# Maxi Roll Holder in Unique Design

The subtle, minimalist design and the ease of both mounting and operation point to the same: a maxi roll holder might actually add extra quality to a rest- or bathroom.

The new maxi roll holder from **d line** accommodates multiple environments: it is manufactured in two sizes and in two different versions: one with a transparent, discreetly dimmed acryl front and one with a brushed stainless steel finish. All four models have an 'indication window' for the roll and are operated with a standard key from **d line**.

Complementing existing products, designer Knud Holscher has managed to incorporate the subtle material of acryl into the design idiom of the **d line** range.
